REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a non-aqueous electrolyte sodium secondary battery comprising a positive electrode active material, having a hexagonal crystal structure, and exhibiting a value of 2 or less obtained by dividing the XRD peak intensity corresponding to an interplanar spacing of 2.20 Å by the XRD peak intensity corresponding to an interplanar spacing of 5.36, and charge carriers are sodium ions.

The prior art, such as Takeda et al. Materials Research bulletin, Vol. 29, teaches a positive electrode material containing sodium and iron. However, the value obtained by dividing the XRD peak intensity corresponds to an interplanar spacing of 2.20 Å (namely, (003)) by the XRD peak intensity corresponding to an interplanar spacing of 5.36 Å (namely, (104) = (014)) is 2.3, greater than the condition (2) required by the instant claims. Therefore, the instant claims are patentably distinct from Takeda.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
